

F Series

STARCOOL F series are plastic films for use in various applications. For the glass lamination process, we have the STARCOOL PVB film with blue and charcoal color options. It offers great adhesion, transparency, and of course significant thermal heat reduction.

For the DIY home market, we have STARCOOL PVC films which also offer excellent transparency with thermal heat reduction. STARCOOL PVC films are the easiest, most economical way to apply our technology; just spray water and attach!
